

Vehicle Wrap Meeting Checklist

- How many installers on this wrap?
- How many hours of install on this ticket? Concerns?
- Where on the vehicle will we begin installing?
- Examine the artwork. Does anything need to be separated out?
- Discuss the paneling. Where will the seams be?
- Do any seams need to be discussed with the client so that they have realistic expectations?
- Has the vehicle been seen in person? Of no: examine the pictures of the vehicle. Are there photos of all sides?
- Does it match the template/proof exactly? (Wheelbase, Windows, Sliding doors, etc.)
- Are there any areas of concern? Any removal required?
- Does the proof show all the sides of the vehicle?
- Do we anticipate any difficulty with the door handles? Confirm that proof matches expectations.
- How much bleed do we want? Have we left ourselves enough wiggle room?

Key Reminders

- All cuts require a second check
- All patches must be discussed and called out immediately
- Panels with text on them require a 2nd management check to ensure level **before** install
